

HSE Policy

Hyosung Heavy Industries Corporation is dedicated to fulfilling its social responsibilities with respect for humanity and environmental preservation, in order to build customers trust and work our way to the top of this company, we comply with the following HSE policies.

I Create customer value through customer immersive management activities

We carefully heed to the needs of customers, and all employees participate in activities to establish and implement specific strategies to save resources and energy, minimize environmental pollutants, and prevent injuries and occupational diseases.

II Advance HSE risk management through digital transformation

We manage HSE risk at every stage from product design, purchase, production, use and disposal based on advanced IT technologies and data base.

III Establish the global best HSE management system

All employees and subcontractors achieve the world-class HSE capabilities through continual training, competency development, and regularly evaluate the management performance, resulting in continual improvement of HSE management system.

IV Manage HSE system to make a sustainable future

We are committed to comply with laws and global agreements, cooperate with subcontractor to grow together and lead contribution activities for community.
